

- Designed specifically for use on highly polished or shiny floors, it will prevent sponge-backed mats from moving out of place.
- They're so effective that only a few are needed even in high traffic areas. See the placement on Figures A and B for best results.
- This unique polymer is permanently tacky and does not promote bacterial growth.
- If it ever gets dusty or dirty, simply wipe it off with **Simple Green**® or a similar cleanser. The strip will quickly dry and regain its tack.
- PKG of (4) 6" x 6" strips

Stock Size	Color
051.6x6BL	Blue

Quick and easy placement of Grip Strips allow for a secure placement of a sponge-backed mat on a highly-polished surface.

Figure A - Grip Strips on a 2' x 3' mat.

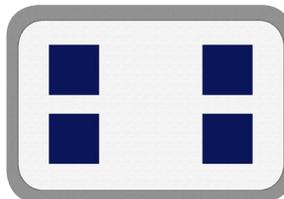

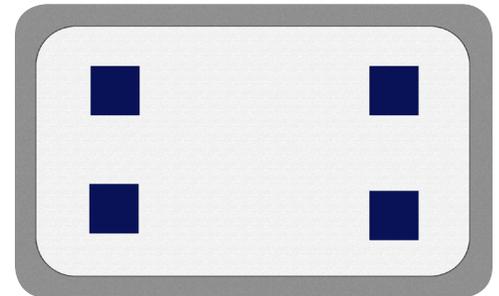

Figure B - Grip Strips on a 3' x 5' mat.

These strips have a protective covering on BOTH sides!

When you are ready to adhere a strip to your mat, please follow these steps:

1. Make sure the floor is clean and dry and that the back of your mat is wiped off and free of debris and dirt.
2. Peel the shiny Mylar® off the "peel and stick" side of the strip. This is the side that adheres to the mat.
3. Lay the strip on the mat and press it down. The glue is an "active" glue which means that it becomes more tacky over time, and may not initially appear to be aggressively stuck to your mat. Don't worry. Within less than 24 hours the strip will be permanently attached.
4. Once the strip or strips are placed on the mat, lift off the dull outer paper.
5. Turn the mat over and position it on the floor.
6. If the strip gets dirty it can be wiped off with **Simple Green**® or a similar cleanser. The strip will dry quickly and re-gain its tack.
