

Solid Step Cote for Bathrooms Recommended Formulation: 02

Here's a frightening statistic. Did you know the bathroom and kitchen account for over 75% of all slip and fall injuries, and the majority of those take place in the bathroom. According to the National Safety Council, one person dies everyday from using bathtub/shower in the United States. And of the 34,000 accidental deaths of people over the age of 65 every year, many are bathing related (Burdman, 2010).

Unfortunately, the majority of slip and fall accidents happen to those who are most vulnerable, young children and the elderly. Protecting yourself and your loved one's bathrooms from unnecessary slip and fall accidents is of the utmost importance.

Attention Facilities Managers! Slip and fall accidents in hotel and hospital bathrooms are a source of countless injuries and billions of dollars in lawsuits, settlements, and insurance claims each year.

Solid Step Cote is a safe, GREEN, and easy to apply solution to the problem of slippery bathroom floors, tubs and showers. Our 02 solution is gentle on the feet, virtually invisible to the eye, and provides non slip protection that far exceeds ADA standards for coefficient of friction.

It is applied by foam brush or roller in a matter of minutes and can be cleaned with any standard detergent, even soap and water. It is water resistant, will not fade, yellow, crack, bubble or degrade over time, and your application of **Solid Step Cote** will provide years of slip and fall protection before needing reapplication. Quit risking the health of yourself, your family, and guests and get **Solid Step Cote** for your bathrooms, tubs and showers now.
