

Solid Step Cote for Grocery and Retail **Recommended Formulation: 03 or 04**

Non- Slip Floors Can Help Prevent Serious Injuries!

Grocery & Retail Stores are some of the most high traffic commercial environments. Grocery store patrons are on their feet drifting between frozen food sections, produce areas, refrigerated food sections and prepared food areas, all of which are prone to producing moisture and extremely slippery conditions for both staff and customers.

Insurance liabilities for no slip or fall as well as lawsuits and settlements make creating an effective non-slip flooring environment in your grocery store or convenience store so important. In addition, many grocery stores and convenience stores opt for inexpensive, durable and easily maintained flooring solutions such as VCT, treated concrete or smooth tile flooring. Unfortunately this usually means a hard, smooth surface that is especially prone to becoming slick and slippery when wet.

Solid Step Cote is the only water-based, non toxic, non slip solution for these and all other grocery and convenience store flooring surfaces that maintains its slip resistance even under wet and oily conditions. **Solid Step Cote** far exceeds ADA standards for coefficient of friction, saving your store the liabilities, worry and expense associated with slip and fall accidents.

Solid Step Cote has no fumes or odors when applied and is ready for foot traffic within 4-6 hours of application. It is inexpensive and easy to maintain, and because it is a Green and non toxic solution, it will keep your store environmentally friendly and compliant with LEED certification standards.

Isn't it time you took control of slip and fall problems in your grocery or convenience store? Get **Solid Step Cote** today and make your store's floor a non slip floor.
