

## **Solid Step Cote for Restaurants**

### **Recommended Formulation: 02 or 03**

The restaurant industry has one of the highest incidences of slip and fall accidents. Because of the constant presence of food, liquids, oils and other slippery substances, slippery conditions are virtually a constant for restaurants.

**Solid Step Cote** is a perfect fit for solving slip and fall accidents in both the front of the house and in the kitchen and dish-washing areas. Creating a slip resistant floor is essential in protecting both restaurant staff and guests, and **Solid Step Cote** is the premier non slip solution on the market today for the restaurant industry.

**Solid Step Cote** is a Green product with low VOC's, fumes and odors making it safe for dining and food prep areas. It is so easy to apply, clean, and it works on ALL flooring surfaces. Best of all, unlike cleaners and degreasers which only can provide effective anti slip protection when the floor is dry, **Solid Step Cote** is extremely effective even under wet and oily conditions in the middle of a busy shift.

**Solid Step Cote** is crystal clear in appearance so your restaurant won't sacrifice aesthetics in order to create a non slip floor. With [four formulas](#) to choose from, there is a perfect solution for every flooring surface and condition. And because Solid Step Cote is a Green, non-toxic solution, your restaurant will maintain the highest standards of environmental responsibility.

**Solid Step Cote** is durable, long lasting and can be walked on within 6 hours of application, allowing for most restaurants to apply the product after the close of business and be ready to open the doors again in the morning.

**Solid Step Cote** is the smart solution for today's restaurants and commercial kitchens who want to maintain the proper balance between safety, ease of maintenance and cost effectiveness. Protect your restaurant business against lawsuits, settlements, workers comp claims and the headaches that accompany them with **Solid Step Cote**.
