

## **Solid Step Cote for Retirement Facilities & Nursing Homes Recommended Formulation: 02 or 03**

Nursing homes, assisted living facilities and retirement communities must take constant precautions for safety and install a Non-Slip floor coating.

Fall accidents are not only the 2nd most common cause of injury and death in the U.S., but the incidence of slip and fall amongst the elderly is particularly high.

Within assisted living facilities there are many areas that frequently become slippery, requiring non slip solutions that provide safe no skid flooring at all times. **Solid Step Cote** is the only truly Green non slip solution that is versatile enough to be used on ALL types of flooring. With SSC, your nursing home, assisted living facility or retirement community's kitchens, hallways, bathrooms, pool decks, tubs and showers will become highly slip resistant, safe for your staff and residents and easy to clean and maintain.

**Solid Step Cote** is water-based, has no fumes or unpleasant odors and dries quickly. It is highly water resistant and will not yellow, crack or discolor in indoor or outdoor environments. It is very durable and lasts for years under most circumstances. This Green product provides a Coefficient of Friction that far exceeds ADA standards and contributes to LEED rating points for your facility.

Make sure your assisted living facility, nursing home or retirement community is safe for your residents, guests and staff at all times. Stop slip and falls and create a no skid zone with **Solid Step Cote**.
