

## **Solid Step Cote for Steps**

### **Recommended Formulation: 04**

Slippery steps around a home or business can be particularly treacherous and are a frequent source of slip and fall accidents. Falling down stairs can cause far more serious injuries than most slip and fall accidents. Protecting your family, friends, employees, tenants, and others from slipping and falling on a staircase by installing a non slip coating. When it comes to ensuring the safety of your property, anti-skid protection needs to be a top priority.

Finding a solution to the problem of slippery steps is easily resolved with **Solid Step Cote**. Our crystal clear solution can be applied to any surface including wood, concrete, marble, composite, stone or painted surfaces. And as a Green product with no fumes, odors or VOC's, **Solid Step Cote** is safe and easy to apply. Just roll it on with a low nap roller and allow it to dry for 4-6 hours and its ready for use! Depending upon the amount of foot traffic your steps encounter, it should last for several years before needing any reapplication.

No more sandpaper strips that curl up and leave sticky residues that attract dirt that won't come off. A quick and easy application of **Solid Step Cote** will do the trick. Best of all its incredibly easy to clean and maintain and will keep your stairs looking great.

If you live in an area that receives a lot of rainfall or faces snowy and icy conditions in the winter, **Solid Step Cote** is a must. Protect your slippery steps and the people who walk on them today...with **Solid Step Cote**.
