# Tuff-Seal Aviation Flooring

**Better** than epoxy-coatings    **Better** than rigid plastic tiles

- ▶ **Quiet...** muffles noise
- ▶ **Warm...** insulates subfloor
- ▶ **Lower life cycle cost...** no need for expensive repair and replacement. Can be easily moved and reused
- ▶ **Flexible...** easily installed over existing/uneven floors, hides cracks, stains, etc
- ▶ **Reduces dust...** keep plane, equipment, hanger and workshop cleaner
- ▶ **Rich looking appearance...** for your homebuilt or corporate jet
- ▶ **Patented design...** hidden interlock keeps tiles locked and watertight
- ▶ **Safe...** high slip resistance
- ▶ **Resists...** aviation fluids, abrasion, indentations, fire and water
- ▶ **Easy install...** just overlap and tap

won't break, crack or deflect under heavy loads
