

Solid Step Cote for Repair and Workshops **Recommended Formulation: 04**

A Non-Slip Coating for workshops, auto repair shops and industrial environments that eliminates slippery floors!

You need durability and performance to create safe non slip flooring conditions. **Solid Step Cote** provides a versatile solution for any auto repair shop or workshop with a range of formulas for these varied environments.

Solid Step Cote is a safe (Green), effective and durable solution. It is delivered in a single component formula that can be applied by anyone without health concerns. It has no fumes, odors, or VOC's and a two coat application can be applied quickly by anyone and will dry to the point of being ready to receive traffic within 4-6 hours. Full cure is 48 hours.

Solid Step Cote bonds incredibly well with concrete, wood, vinyl or floors that already have a protective epoxy coating or varnish. Just clean the floor with a mild soap and water, removing dust, dirt and oils prior to application and lay it down with a low nap roller or airless spray. And in most cases **Solid Step Cote** will last for years before needing reapplication.

Never before has creating a non slip workshop or auto repair shop floor been so easy. Keep your workers safe from the threat of wet, oily, or dusty floors that are a constant slip and fall hazard today. Protect your shop from the burden of ballooning insurance premiums and liabilities. Get the best non slip coating. Get **Solid Step Cote** now and get the peace of mind you require.
